## Fall Festival

Thank you to all of the parents who were able to help with the party. I believe the kids had a great time.

Just a quick note for those of you who have not had me for your child's teacher previously: Parents are always welcome in our classroom (volunteering, or for parties). The only time I am limited is in field trips. I must abide by the rules of the place we are visiting.

Halle Heart Center only allows 1 parent per 10 students. If you have not yet turned in your money or permission slip, please do so. The field trip is not until November 27<sup>th</sup> but we need to have our money in well before that time. Thank you for your ongoing support.

Module 1 sets the foundation for students to master the sums & differences to 20. Later they will apply these skills to fluently add one-digit to two-digit numbers through 100 using place value understanding & relationship between addition & subtraction.

Topic A reactivates students' Kindergarten & Grade 1 learning as they practice prerequisite skills for level 3 decomposition and composition methods.

Students will make number bonds of 10 with a subtraction focus. They will decompose to subtract from a ten when subtracting within 20 & apply to one-step word problems.

As your child works through the math it is important that you ask that they share their thinking of how they arrived at the answer and why they did it the way they did.
